

Vendor Registrations Playbook — Work Top to Bottom

Each section is one registration: where to go, what to enter (use the Company Data Sheet in the NEMT packet — same answers everywhere), and what proof to save. Items are ordered by speed-to-revenue.

1. Medzoomer — pharmacy delivery (fastest first dollar)

Nationwide Rx last-mile platform used by independent pharmacies; self-serve signup, per-delivery pay, app dispatch.

1. Apply at courier.medzoomer.com/sign-up — use Info@trustcsl.com; enter the Ford Transit and Richmond coverage area.
2. Complete their background check and app onboarding.
3. PROOF: approval email + courier app account active.

2. Lab Logistics — contracted lab routes (10-minute application)

National 3PL managing courier networks for 450+ hospitals and labs; they contract local courier companies for dedicated specimen routes and reach out when Richmond work opens.

1. Complete the contractor profile at lablogistics.com/drive-for-us (no phone inquiries — form only).
2. List: HIPAA/BBP/specimen-integrity training, cargo van, Richmond ~25-mile core radius, 24/7 STAT capability.
3. PROOF: submission confirmation; log any callback in the portal pipeline.

3. Bon Secours Richmond — symplr credentialing + Supplier Diversity

St. Mary's, Memorial Regional, and St. Francis plus their surgery centers. Vendor reps must be credentialed in symplr (annual fee applies). Their Supplier Diversity Initiative is the warm door for a minority-owned/SDV courier.

1. Register at symplr.com/mercyhealth (support: 888-476-0377).
2. Separately, submit CSL to the Supplier Diversity program via bonsecours.com → About Us → Supplier Diversity, attaching the capability statement.
3. Ask the diversity office for an introduction to Richmond-market supply chain for courier / inter-facility transport.
4. PROOF: symplr credential confirmation + diversity program submission receipt.

4. Quest Diagnostics — supplier registration + diversity program

Quest buys logistics/courier as a corporate category and tracks diverse-supplier spend; Richmond patient service centers generate daily specimen logistics. Entry is usually overflow, STAT, and edge routes.

1. Register at questdiagnostics.com → Our Company → Suppliers & Partners → Registration (form: provider.questdiagnostics.com/Supplier-Registration).
2. Flag minority-owned and service-disabled-veteran-owned status in the supplier-diversity section.
3. Category: courier / logistics / medical specimen transportation, Richmond VA market.
4. PROOF: registration confirmation email.

5. VCU Procurement + VCU Health vendor registration

VCU's own guidance shows same-day courier is uncontracted (statewide contracts cover UPS/FedEx parcel only) — departments buy it ad hoc. SWaM certification makes CSL eligible for set-asides here.

1. Register as a supplier with VCU Procurement: procurement.vcu.edu → For Suppliers (office: 804-828-1077).
2. Review VCU Health's vendor page (vcuhealth.org → Who We Are → Vendor Information) and watch its Upcoming Public Solicitations page monthly.
3. Send the capability statement to VCU Procurement flagging courier/medical transport, NIGP 962-86 / 948-55.
4. PROOF: supplier registration confirmations for both.

6. HealthTrust / HCA Virginia (longer play — optional now)

HCA's five Richmond hospitals buy through the HealthTrust GPO with rep credentialing via VPro/Parallon; local facility managers can still buy small local services directly.

1. Apply for HealthTrust supplier-portal access: healthtrustpg.com/suppliers.
2. Register rep credentials at the HCA VPro portal (hcp.hcahealthcare.cloud).
3. PROOF: portal access confirmations. Then cold-call facility supply-chain directors about STAT/overflow courier.

Every application above uses the same core data — the Company Data Sheet in the NEMT Enrollment Packet. Fill in the [FILL IN] blanks once (EIN, UEI, CAGE, USDOT #, policy numbers, VIN) and reuse everywhere.
