

Never Miss a Solicitation — Alert Setup (One Hour, Once)

VA contracting office NCO 6 (which buys courier services for the Richmond VAMC) posts solicitations with 3–9 DAY response windows. Without saved-search alerts, CSL will never see them in time. Set these up once; the AI engine's weekly sweep is the backstop, but same-day email alerts win these races.

SAM.gov — federal (15 minutes)

1. Sign in at sam.gov with CSL's entity account → Search → Contract Opportunities.
2. Build search #1: keyword **courier**, Federal Organization **Veterans Affairs**, Place of Performance **Virginia**, status Active. Save it and turn on email notifications (daily).
3. Build search #2: Product/Service Code **R602** + Notice status Active, all agencies, Place of Performance Virginia. Save with notifications.
4. Build search #3: NAICS **492110** and **485991**, set-asides SDVOSB + Total Small Business, Virginia. Save with notifications.
5. Also run the VISN 6 procurement forecast query at **vendorportal.ecms.va.gov** (Forecast of Contracting Opportunities → NCO 6 / VISN 6, NAICS 492110 & 485991) each quarter — this previews FY27 recompetes including the Richmond VAMC courier work.
6. PROOF: screenshot each saved search confirmation.

Virginia eVA — state & local (15 minutes)

1. Log in at eva.virginia.gov with CSL's supplier account.
2. Confirm commodity codes on the profile: NIGP **962-86** and **948-55** — eVA emails solicitations matched to profile codes automatically.
3. In Virginia Business Opportunities (VBO), save keyword searches: **courier**, **specimen**, **pharmacy delivery**, **medical transport**.
4. When SWaM certification lands, verify the profile shows it — buyers filter searches by SWaM.
5. PROOF: profile screenshot showing both NIGP codes.

Local portals — Richmond metro (30 minutes)

- Chesterfield PlnG / Proactis WebProcure: set commodity-code alerts on 962-86 & 948-55 (support: webprocure-support@proactis.com, 866-446-8203) — CSL is already registered
- Henrico County: register on the vendor list and bookmark the Purchasing 'Bids and Proposals' board (henrico.gov → Finance → Purchasing) — check weekly
- City of Richmond: rva.gov → Procurement Services → Solicitations — check weekly; city also posts to eVA
- GRTC (BeaconBid): free registration at beaconbid.com/solicitations/grtc-transit/register
- Hanover County + Petersburg: bookmark their procurement pages; low volume, monthly check is enough

Who does what

Darren: click through the setups above (they require CSL's logins) and forward any alert email to the engine. AI engine: sweeps all of these sources weekly regardless, scores anything new, and files it in the portal — the alerts exist so

nothing with a 3-day window slips between sweeps.
